1. Schönau

Considerable progress is being made in the construction of the Schönau power station; the shell of the building is finished, the turbo-canal is being concreted, and machine bases laid. The turbines have been ordered from J. M. Voith of St. Pölten, the generators from the Elin works in Vienna. Details on their number, type, and capacity are not yet known.

2. Stopfenreuth

Initial clearing is in progress at Stopfenreuth; four excavators are in operation.

3. Altenwörth

Clearing work is in progress with seven excavators and a light field railroad; a start has been made on construction of the walls of the power station.

4. Ybbs

Five excavators are still at work on earth removal; the walls are being constructed, and concrete foundations are being laid.

5. Kornenburg

Work has reached a similar stage to that at Ybbs. So far, no machinery has been installed, but the turbo-canal is being concreted.
